

$$\boxed{P(s, a)} \quad \times \quad \boxed{\sqrt{N_{\text{parent}}}} \quad \div \quad \boxed{1 + N(s, a)} \quad \times \quad \boxed{c(N_{\text{parent}})}$$

policy prior

$N_{\text{parent}} \uparrow \Rightarrow U \uparrow$

$N(s, a) \uparrow \Rightarrow U \downarrow$

slow log schedule

$$U(s, a) = P(s, a) \frac{\sqrt{\sum_b N(s, b)}}{1 + N(s, a)} \left(c_1 + \log \frac{\sum_b N(s, b) + c_2 + 1}{c_2} \right)$$
